NORIBACHI ILLUMINATES HYDRAFLOW HEADQUARTERS WITH NEW LED HIGHBAY LIGHTING SOLUTION

New LED Highbay Lighting Solution Increases Energy Efficiency And Cost Savings While Providing Quality Lighting Across Entire Facility

HARBOR CITY, CA - April 1, 2015: Noribachi, a leading U.S.-based custom LED manufacturer for high output commercial and industrial solutions delivered an upgraded LED Highbay lighting solution for Hydraflow, a leader in the design and fabrication of low pressure fluid transfer components for aerospace and high technology applications, in order to illuminate their poorly lit manufacturing floor (www.hydraflow.com).

For Hydraflow's 173,000 square foot facility in Fullerton, CA, Noribachi engineered 384 new LED Highbay fixtures with occupancy sensors and bi-level diming to replace the existing low-performing 400W metal halides. The new LED Highbay lighting installation provides energy and cost savings while simultaneously delivering quality lighting during and after prime work hours.

Hydraflow's project goal was to increase efficiency and reduce peak-demand as well as decrease the maintenance requirements to avoid production interruption and additional costs. The new LED lighting solution also had to qualify for the healthy rebate incentives offered through the Public Utilities Commission and Southern California Edison.

"Noribachi delivered the fixtures on time in batches so my employees could employ them as they arrived. They were able to meet the specific requirement of including the same installation hook and electrical connector so my own maintenance staff could simply unplug / unhook the old fixture and then plug and hang the new ones," said Paul Rodolf, Director of Operations, Hydraflow.

A month after the installation, the upgraded LED Highbay lighting solution reduced the peak demand by 64.8 kWh and the average daily usage by 28.76 kWh.

"It was a joy working with Paul on the Hydraflow headquarters project," said Hamish Huntly, Corporate Development Manager, Noribachi. "This was a great collaboration between two U.S. manufacturers. It exemplifies that quality manufacturing can and will continue to thrive here. With our customized products Hydraflow was able to quickly realize significant energy savings and maximize their rebate potential from the local utilities."

About Noribachi:

U.S.-based Noribachi is a leading custom LED manufacturer for high output commercial and industrial solutions. Noribachi applies a Bespoke Engineered & Specifically Tailored (BEST) methodology to deliver unlimited LED lighting applications.

Noribachi is dedicated to improving the lighting industry by incorporating design and technology to our BEST lighting solutions. For more information, visit www.noribachi.com

About Hydraflow:

Hydraflow is leader in the design and fabrication of low pressure fluid transfer components for aerospace and high technology applications. Hydraflow operates from a single headquarters and manufacturing facility located in Fullerton, California. Hydraflow products are flying on virtually every commercial airliner being built today and many of the world's military aircraft. Hydraflow products are 100% manufactured in the United States with 90% of our supplier base located within a 50 mile radius of the Fullerton facility.
