

LED Gym Lighting
is a **SLAM
DUNK**

LED lighting is a great option for sports illumination. LED's produce less light pollution, helping athletes and fans stay focused on the game, not the glare.

SETTING:

Wilson Athletic Center, New Mexico Highlands University, Las Vegas, NM

HEROES & VILLAINS:

Noribachi 168W hex.8//ROU LEDs replace 400W High Bay Incandescents.

MORAL:

78 bulbs replaced with LED lighting to save over \$15,000 annually.

UNIQUE MOTIVATION:

Improve the lighting in an athletic center while saving time and money related to maintenance.

PLOT:

Like the ancient Aztec game referred to simply as Pelota, basketball requires precision. Although in basketball they don't sacrifice the losing team, emotions can still run pretty high, particularly in college games. To help keep their home court up to date New Mexico Highlands University enhanced the lighting in their Wilson Athletic Center with Noribachi LED lights. The new lighting is brighter and clearer, resulting in safer, more precise play, while spectators get a sharper viewing experience. It's not Madison Square Garden, but it just might look better.
