

NORIBACHI

abq's  
PREMIER  
HEALTHCARE  
PROVIDER

installs earth-healthy  
LEDS

Presbyterian is committed to a single purpose - improving the health of individuals, families and communities throughout New Mexico.

By installing Noribachi LED bulbs, the most energy efficient lighting available, Presbyterian shows its commitment to improving the health of the environment as well.

### SETTING:

Presbyterian Hospitals,  
Albuquerque, NM

### HEROES & VILLAINS:

A range of Noribachi LED bulbs, including, 115W lin.16//REC to replace 500W metal halide bulbs and Noribachi T8.4ft LED Bulbs to replace fluorescent tubes.

### MORAL:

At the Montgomery location a combination of Noribachi LED bulbs, lighting controls, and solar power has reduced energy consumption by 58% in September alone.

### UNIQUE MOTIVATION:

Extending health care benefits to the Land of Enchantment - a healthy environment makes a healthy community. Sustainable LEDs light up facilities - and lighten the grid load.

### PLOT:

Why stop at healthcare for humans? Keeping the environment healthy is just another way Presbyterian demonstrates its leadership position as a healthcare provider.

Performing minor surgery on 100 Northside location parking lot lights with an LED retrofit resulted in whiter, longer lasting, 80% more energy efficient lighting.

And speaking of healthy lights, replacing toxin-filled fluorescents with LEDs is just what the doctor ordered!
