FOR IMMEDIATE RELEASE

NORIBACHI EXPANDS INTO COLOMBIAN LED LIGHTING MARKET

Diconsultoria S.A. Will Serve As Colombian LED Lighting Products Distributor

HARBOR CITY, CA - May 27, 2015: Noribachi, a leading U.S.-based custom LED manufacturer for high output commercial and industrial lighting solutions, announces its Bespoke Engineered and Specifically Tailored (BEST) LED lighting products are RETILAP certified through CIDET and are now available in Colombia.

Diconsultoria S.A., a Colombia-based engineering firm, will serve as the distributor for the custom manufactured LED lighting products. "We are excited about our partnership with Noribachi because of their U.S. manufactured LED lighting products and product warranties," says Henry Sanchez, General Manager, Diconsultoria S. A. "The variety of LED lighting products along with the RETILAP certification will give our company the opportunity to take advantage of Colombia's expanding environmental initiatives."

The RETILAP certification through CIDET certifies a majority of Noribachi's LED fixtures and light engine retrofits, and allows Noribachi to comply with Colombia's electrical requirements for lighting. The partnership and certification allows Diconsultoria S.A. to pursue industrial, commercial, government, architectural and bespoke projects that are now in development due to Colombia's economic growth. The Diconsultoria S.A. and Noribachi are also able take advantage of the United States-Colombia Trade Promotion Agreement (CTPA) that removes the tariffs on a majority of consumer and industrial goods exports to Colombia.

"This new market is a result of our success in Mexico and Canada," says Carolina Lopez, Director of International Business Development, Noribachi. "It is a very exciting time to be a part of Colombia's increasing business and environmental opportunities, and we have the perfect partner and LED products to be a success."

"It was a joy working with Paul on the Hydraflow headquarters project," said Hamish Huntly, Corporate Development Manager, Noribachi. "This was a great collaboration between two U.S. manufacturers. It exemplifies that quality manufacturing can and will continue to thrive here. With our customized products Hydraflow was able to quickly realize significant energy savings and maximize their rebate potential from the local utilities."
