

# Digital Signage Software

The software behind the LED displays is what truly allows the LEDs to come ALiVE. Noribachi will offer two software solutions with the purchase of LED or LCD display products. The first solution allows for complete control over one display at a time by creating content and schedules. The second solution, that is coming soon, has enhanced features such as controlling multiple screens at once from a central location.

Noribachi is proud to offer both hardware and software solutions for your LED digital signage needs.

# Standard Noribachi Software

Noribachi’s Software solution comes standard with all Noribachi display purchases. This comprehensive solution is the perfect option for easy to access digital signage. The software is user friendly and makes it easy to create and manage timed schedules with a variety of commonly used file formats. This solution is an application that can simply be downloaded onto any computer with the supported operating systems that is hardwired to the display.

Creating the schedule can be done using the Noribachi software at almost any computer. The schedule file can then be transferred to the computer attached to the display. This allows for the formatting and editing to be done at the comfort of your own desk. The software is offered at no monthly fee and includes a tutorial at the time of installation on how to use as well as a comprehensive user manual. There is also a turnkey computer available to purchase with displays. It comes with the complete software solution downloaded and ready to use. More information about the offered computer, please contact Noribachi at [Noribachi.com](http://Noribachi.com) or 855.283.1100.
